DETAILED ACTION

Claims Status: 1 -24, are rejected.

Applicant's arguments with respect to claims 1-24 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn. The Applicant argues that the below grounds of rejection were new-grounds of rejection, not necessitated by Applicant response. The Examiner agrees. A non-final action will be mailed to the applicant and restart the time.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-24, are rejected under 35 U.S.C. 103(a) as being unpatentable over Bunnell, and further in view of Morgenstern (US Patent No. 5,970,490).

1. Regarding Claims 1, 6, 11, and 16, Bunnell discloses a method for managing a plurality of nodes in a layered hierarchically organized database stored in a server on a computer network (see Fig. 2, 30, column 6, lines 27-32, Bunnell) comprising:

Application/Control Number: 09/747,428

Art Unit: 2171

accessing a subset of said nodes in response to a client request (see column 5, lines 21-27, Bunnell);

modifying one or more state attributes associated with said nodes to control merging and updating of layers to a resulting layered hierarchical database in response to said client request (see column 6, lines 7-10, Bunnell); and

Bunnell discloses all the claimed subject matter as set forth in the rejection above, but Bunnell does not explicitly disclose the method managing said nodes using said state attributes, wherein each one of the state attributes comprises an eXtensible Markup Language (XML) format attribute. However, Morgenstern discloses the use of an extensible Markup Language (XML) (see column 45, lines 28-37, column 46, lines, 1-5, Morgenstren). It would have been obvious to the ordinary skilled artisan at the time of the invention to use the XML of Morgenstren in Bunnell by using XML. The ordinary skilled artisan would have been motivated to make such modification in order to extend and eventually supersede HTML, since it's well known that XML, allows web developers and designers create customized tags that offer greater flexibility in organizing and presenting information than is possible with the older HTML document coding system. XML is defined as a language standard published by the W3C and supported by the industry.

- 2. Regarding Claims 2, 7, 12, and 17, the combination of Bunnell/Morgenstern discloses a method wherein said state attributes indicate that a corresponding data element is one of updated default, deleted, and added (see Fig. 3, step 55, column 9, lines 18-21, Bunnell).
- 3. Regarding Claims 3, 8, 13, and 18, Bunnell discloses a method wherein each one of said state attributes includes a value of one of default, replaced, modified, and deleted,

Application/Control Number: 09/747,428

Art Unit: 2171

indicating a last action taken on a corresponding data element (see column 7, lines 37-39, and column 9, lines 39-55, Bunnell).

- 4. Claims 4, 9, 14, 19, and 21-24, the combination of Bunnell/Morgenstern discloses the method wherein each one of said nodes comprises an XML node (see column 45, lines 38-45, Morgenstern).
- 5. Regarding Claims 5, 10, 15, and 20, the combination of Bunnell/Morgenstern discloses a method wherein said nodes are organized in a Document Object Model format (see column 10, lines 64-53, Bunnell).

Points of Contact

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sana Al-Hashemi whose telephone number is (703) 305-4881. The examiner can normally be reached on Monday - Friday from 8:00 AM to 4:30 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Safet Metjahic, can be reached on (703) 308-1436. Any response to this office action should be mailed to: The Commissioner of Patents and Trademarks, Washington, D.C. 20231. Or telefax at phone number (703) 872-9306. For formal or draft communications, please label "PROSPOSED" or "DRAFT". Hand-delivered response should be brought to Crystal Park II, 2121 Crystal Drive, 6th Floor Receptionist, Arlington, Virginia. 22202.
